

## SECURITY TAKES ON COLOR

# FORTUNA

The TAGIT Fortuna system is manufactured using high quality materials. Using its patented 3D detection it produces high level detection in all three label orientations. The aisle width depends on the configuration and the on-site electrical noise level.

This system is designed for the protection of confidential documents at high-tech companies and government institutions, items for libraries, archives and retailers.

Standard color is white. Other colors are available in accordance with customer request.

- » SUPERIOR 3D DETECTION ©
- » DETECTS LABELS ON METAL
- » DETECTS LABELS COVERED IN ALUMINUM FOIL
- » DIGITAL SIGNAL PROCESSING
- » EXCELLENT SURFACE FOR ADVERTISEMENTS
