

## LYNGSOE LIBCABINET™

### ACCESS TO BOOKS 24/7

With the Lyngsoe LibCabinet™, you can offer an independent mini library at an indoor location of your choice; the patrons can have access to your books 24/7. With a combined check-in, check-out and holds function, all you need is a network cable and power outlet. The LibCabinet allows you to maintain or even significantly extend the library's reach.

### FAST AND EASY RETURN OF BOOKS

The stylish, transparent doors are equipped with an electronic lock that can easily be opened by presenting a patron card to a card reader. The patron takes the books he or she wants and just closes the door again. After closing the door, the LibCabinet prints out a receipt, which tells the patron exactly which books he or she has taken and when they need to be returned. Returning a book is equally simple: present the card - open the door - return the book.

### INTUITIVE USER EXPERIENCE

The intuitive user interface gives the patrons all the information they need. An integrated thermal printer provides the patron a receipt of all transactions that have taken place, so they can always check what they have returned or checked out of the library.

### FULL INVENTORY OVERVIEW

The LibCabinet communicates over the industry protocol SIP; all lending traffic is fed back to your library management system.

The LibCabinet software has a full feature maintenance mode. While in maintenance mode you can perform a full inventory and print out the inventory result. LibCabinet can be connected to our Centralized Management software, which provides reporting and remote control functionalities.

### BENEFITS

- Can be placed in any location
- Easy and fast check-out, check-in and holds
- Smart phone identification
- No staff needed
- Very large capacity 200+ items
- Very fast read < 5 sec.
