

LYNGSOE DIGITAL POSTER™

SHARE NEWS AND IMPORTANT INFORMATION, RUN PROMOTIONS, AND ADVERTISE FOR LIBRARY EVENTS AND NEW ITEMS IN YOUR COLLECTION. ONLY YOUR IMAGINATION SETS THE LIMIT.

Share the news! Get the attention of all your library visitors with eye-catching, digital information using the self-service kiosks installed in the library space.

Create content easily in the simple and intuitive web application. Use pre-defined layout templates for a mix of appealing content of images, videos, text, existing web pages or RSS feed, and create beautifully designed and informative digital poster carousels on every kiosk display throughout the library in a few minutes.

Through the Lyngsoe Central Management™ web interface, you can configure entire kiosk groups with different digital poster carousels. You can thereby customize your content, targeting specific visitor groups in different areas of the library – all managed from any PC within the network with a web browser.

Activate the digital poster carousel with a single click and choose if it should run in screen saver mode when the kiosk is idle and not used by any patrons for self-service, or also create a menu item on the main page where the patron can activate, see and navigate the digital poster carousel on demand.

Use your imagination and creativity to create digital poster carousels for display on any of the Lyngsoe self-service kiosks and utilize the displays even more.

BENEFITS

- Sharing of news, promotions, and event details.
- Tailor content to specific visitor groups in different areas of the library.
- Quick and easy content creation using intuitive templates.
- Flexible Activation Options as screen saver or via menu item.
- Explore limitless possibilities for creativity and imagination.
